CHAPTER THIRTEEN.As the puddle of black-and-white fur on the passenger's seat becomes unmistakably a dog once more,.Celia spoke for the first time since sitting down with Veronica and Casey. Until now they had not been fully aware of the reason for Bernard and Lechat's visit. "Either way a wanting won't do any good," she said. "Whether you issue one now or later is academic. He would defy it. You don't know him. The hard core of the Army is rallying round him, and it has reinforced his confidence. He thinks he is unbeatable." Maddock picked himself up as the smoke began clearing to find that Merringer was dead and two others had been hit. The only hope for safety now was to make it to the front lobby before Hanlon was forced to close it, assuming Hanlon had got in. "Go first with four men," "But you saw where the paths led." Her aunt, from whom fate had stolen everything except a reliable sense of humor, referred to the yard as Slessor recognized Bernard as one of Merrick's former officers. Each generation contained just eight particles: six quarks and two leptons. The first generation comprised the "up" and "down" quarks, each appearing in the three colorcharge variants peculiar to the strong nuclear force to give six in all; the electron; and the electron-type neutrino. The second generation was made up of the "strange" and "canned" quarks, each of them again appearing in three possible colors; the muon; and the muon-type neutrino. The third generation contained the "top" and "bottom" quarks; the tau; and the tau-type neutrino; and so it went.Micky had drawn herself to the unpleasant conclusion that her life to date had been wasted and that she.icals are among its major products, as well as electricity." In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. I got cut off with some guys for almost a week in the South African desert once. All you think about is water. You can't describe the craving. You'd cut off your arm for a cup." He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. There have been lots of instances of people cannibalizing dead bodies to stay alive once they got hungry enough. They've killed each other over potato peels." "Who said that originally? Thomas Jefferson? Abe Lincoln?" "Yes, Jay. Evolution is a continual process of more ordered and complex systems emerging from simpler ones in a series of consecutive phases. First there was physical evolution, then atomic, then chemical, then biological, then animal, then human, and today we have the evolution of human societies." Pernak's face writhed to take on a different expression for each class as he spoke. "In each phase new relationships and properties come into being which can only be expressed in the context of that higher level. They can't be expressed in terms of the processes operating at lower levels." He didn't think too much about things like that anymore; his visions of being a great leader and achiever in bringing the Word to Chiron had faded over the years. And instead . . . what? Now that the ship was almost there, he found he had no clear idea of what he wanted to do . . . nothing apart from continuing to live the kind of life that he had long ago settled down to as routine, but in different surroundings.
