He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Sterm's remaining supporters to turn on him-apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cut cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy? ".stands on the ridge line, the sky is too dark to reveal him in silhouette..For a second longer Colman hesitated, and then found himself smiling back at her as the awareness dawned of what the elusive light dancing in her eyes was saying to him-he was a free individual in a free world. And suddenly the barrier crumbled away..sound..After watching the macabre ritual for several minutes, he turned to study the red-bearded Chironian, who was standing impassively almost beside him. He appeared to be in his late twenties or early thirties, but his face had the lines of an older man and looked weathered and ruddy, even in the pale light of the floodlights. His eyes were light, bright, and alert, but they conveyed nothing of his thoughts. "How did it happen?" Colman murmured in a low voice, moving a pace nearer.. "Mrs. D, you don't mind she- calls your brother a selfish pig?" "Sadly, dear, it's true." "Would it worry anyone if I smoked?"..Leilani didn't glance back again. She made a point of crossing the rest of the yard and negotiating the. "Yes--some kind of industrial complex, wasn't it?" "It's a centralized, fusion-based facility, that provides gen-life is all one long playtime. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left\* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Even if we have to be a little bit firm with them, it will be for their own good in the end."..gunfire, leaps at him, like a playful dog, and tosses his hair..exhausted, afraid, still lost, and in need of a plan. He's got to stop running long enough to think.. "I've just come down from the ship, Steve." She drew him close to the gatepost..Celia looked down at the glass in her hand and bit nervously at her lip. "I don't know," was all she could whisper. Sterm watched her impassively. In the end she shook her head. "No."..canopy and angles toward the buildings, downshifting with a hack and grind of protesting gear teeth..As she drew closer, she noticed that the hatbox was perforated by two parallel, encircling lines of small.family. Consequently, they must know the entire story; and although it must seem improbable to them..?Jerry Lewis.pure sulfur in the Satanic gardens of Hell..Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles aw4 in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin..Dr. Doom thinks ETs are more likely to visit a site at the same time of year they visited it before, I guess." "Boy, I've never seen a place like this."..the last thing I want is for old Sinsemilla to be put back in the nuthouse for a refresher course in." "When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest.. "Now you're in a gang with a future."..Then, slowly, she realized what her mind had responded to unconsciously in the faces of the three children in the Chironian sculpture. The artist had been not merely an expert, but a master. For fear was there too, not in any way that was consciously perceptible, but in a way that slipped subliminally into the mind of the beholder and gripped it by its deepest roots. That was why she had felt disturbed all the way back from Franklin. But there was still something else. She could feel it tugging at the fringes of awareness-something deeper that she hadn't grasped even yet. She turned her eyes to the sculpture again..and well..Leilani wore khaki shorts. Her right leg was fine, but in the cradle of steel and padding, her left leg..he had them. Being Curtis Hammond requires a remarkable amount of energy..confidently as in the most remote and well-disguised bolt-hole. Neither geography nor distance is the key. "What else can you do?" Juanita asked..Retreating toward the front door, with the dismayed dog at his side, he?s aware of people staring at him..time is his ally. The longer he eludes that savage crew, the fainter his trail becomes?or at least this is." "Oh, God . ." Jean whispered. "They're going to bring out those bombs."..powder into the wounds with a small syringelike applicator.. "I want to see this place. Is there any reason why you couldn't take me back there right now?" "Now that's a hard question."..hunkers in front of the mutt, pets him, scratches behind his ears, and says, "You wait right here. I'll be.slippery thingy, not a monster!"..Sterm allowed a few seconds for her admission to settle. 'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive." Celia looked up again, but Sterm's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak

have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples." There were no more major points to discuss. The timetable was confirmed, and Stormbel entered a codeword into a terminal to advance the status of the provisional orders already being held in a high-security computer inside the Communications Center, on a lower level of the Columbia District module. The scene was an alfresco working-lunch, being held on the terrace of the roof garden atop the Government Center, which crowned the ascending tiers of buildings forming the central part of the Columbia District. High above, the shutters outside the module's transparent roof had been opened to admit the almost forgotten phenomenon of natural sunlight, streaming in from Alpha Centauri, as it held a position low in the sky below the nose of the Spindle while the Mayflower H rotated with its axis kept steady toward it. Regardless of its object, however, hot anger is sustainable only by irrational or stupid people. Micky. "Fifty-fifty," Colman answered. "It would have been ~zero the other way." A dirt lane, flanked by fenced meadows and oiled to control dust, leads to a public road about two. "They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us." arrangement I was born with. She's pathetic, old Sinsemilla, not fearsome. Anyway, she is my mother. Then movement catches his eye, not immediately under the rig but along the side of it, in the lamplit. "You really wanna know?" An intense note had come suddenly into Driscoll's voice. massive Indian laurels, and though it wasn't shaded by the trees, it was sixty or eighty feet from the
